Technovation, 15(10) (1995) 631–635

Contents of Volume 15, 1995

Number 1

Refereed papers

The implications of TQM for R&D strategy in New Zealand firms
J. Fisher, C. Kirk and D. Taylor 1

An integrated approach to the diffusion of technological innovation: the non-manufacturing advanced robotics field
Francesca Sgobbi 11

Inward technology transfer as an interactive process
P. Trott, M. Cordey-Hayes and R.A.F. Seaton 25

Number 2

Refereed papers

Innovation in East Asia: diversity and development
Mike Hobday 55

Japan's R&D strategy reconsidered: departure from the manageable risks
Yasunori Baba, Jun-ichi Kikuchi and Shunsuke Mori 65

Manufacturing strategy and environmental consciousness
Joseph Sarkis 79

The importance of complementary assets in the development of smart technology
Margaret R. Sheen and Jillian C. MacBryde 99

The optimal lifetime of capital goods and pricing policies for replacement components and repair costs
Adolf Stepan and Christian Hillinger 111

Contents of Volume 15, 1995

Number 3

Refereed papers

Cross-border linkages and the US defense industry: outlook and policy challenges
Michael W. Chinworth and David C. Mowery 133

Concentration, firm size and innovation: evidence from innovation costs
Daniele Archibugi, Rinaldo Evangelista and Roberto Simonetti 153

Kirton adaption–innovation theory: organizational implications
Samuel Mudd 165

Keynote Address

Managers as entrepreneurs: a view from Asia
A.L. Minkes 177

Number 4

Refereed papers

R&D in corporate strategies in UK materials-innovating companies
David Wield and Robin Roy 195

Automotive component innovation: development and diffusion of engine management technologies
R.G. Amey 211

Patenting strategies in the German mechanical engineering industry and their relationship to company performance
H. Ernst 225

A new program in cooperative research between academia and industry in Korea, involving Centers of Excellence
Soon Il Ahn 241

Number 5

Refereed papers

Cognitive styles of consumer initiators
Gordon R. Foxall 269

Industrial innovation and parallel accounting developments
R.C. Sweeting and R.E. Davies 289

Small-firm formation in biotechnology: a comparison of France, Britain and Canada
Vivien Walsh, Jorge Niosi and Philippe Mustar 303

Number 6

Refereed papers
The Spanish innovative firm and the ESPRIT, RACE and EUREKA programmes: an organizational approach
Ana María Barañano 339

Innovation cycles and flexible automation in manufacturing industries
Angel Martinez Sanchez 351

Disassembly and recycling of electronic consumer products: an overview
Ad de Ron and Kiril Penev 363

Innovation implementations in Malaysian firms: process, problems, critical success factors and working climate
M. Zain Mohamed 375

Publicly produced knowledge for business: when is it effective?
Povl A. Hansen 387

Number 7

Refereed papers
Establishing technology transfer infrastructure as a strategy for promoting manufacturing automation in Taiwan
Raykun R. Tan 407

Significance of reverse transfer of technology and experiences with its promotion in industrialised countries
Jan Elshout 423

On the definition and measurement of technological discontinuities
Ellinor Ehrnberg 437

An initiative for the development of creativity in science and technology (CREST): an interim report on a partnership between schools and industry
David Lethbridge and George Davies 453

Number 8

Refereed papers
Empowerment and total quality: comparing research findings in the USA and Brazil
T. Diana L.v.A. de Macedo-Soares and Débora C. Lucas 475

New technology-based firms and technology acquisition in Portugal: firms' adaptive responses to a less favourable environment
Margarida Fontes and Rod Coombs 497

Technological penetration and organizational learning in SMEs: the cumulative effect
Élisabeth Lefebvre, Louis A. Lefebvre and Maria-Josée Roy 511

Number 9

Refereed papers
Complexities of collaborative product development
Margaret Bruce, Fiona Leverick and Dale Littler 535

Breeding innovation clusters through collaborative research networks
Shantha Liyanage 553

The delicate task of linking industrial R&D to national competitiveness
Maria Papadakis 569

Number 10

Refereed papers
Value generation by industrial research
Klaus Brockhoff 591

The generality/specificity issue in consumer innovativeness research
Ronald E. Goldsmith, Jon B. Freiden and Jacqueline K. Eastman 601

University–industry relationships in peripheral regions: the case of Aragon in Spain
Angel Martinez Sanchez and Ana Clara Pastor Tejedor 613
